### RISK AND REWARD PROFILE

- This indicator shows how much a fund has risen and fallen in the past, and therefore how much a fund's returns have varied. It is a measure of the fund's volatility. The higher a fund's past volatility the higher the number on the scale and the greater the risk that investors in that fund may have made losses as well as gains. The lowest number on the scale does not mean that a fund is risk free.
- The fund has been classed as 4 because its volatility has been measured as average.
- This indicator is based on historical data and may not be a reliable indication of the future risk profile of the fund.
- The risk and reward profile shown is not guaranteed to remain the same and may shift over time.
- Counterparty Risk: As the fund may enter into derivative agreements there is a risk that other parties may fail to meet their obligations. This may lead to delays in receiving amounts due to the fund, receiving less than is due or receiving nothing.
- Currency Risk and Credit Risk: As the fund invests in overseas securities, movement in exchange rates, when not hedged, may cause the value of your investment to increase or decrease fixed interest securities are affected by trends in interest rates and inflation. If interest rates go up the value of capital may fall and vice versa. Inflation will also decrease the real value of capital. The value of a fixed interest security is also affected by its credit rating.
- The fund may utilise derivatives, whether exchanged traded (i.e. dealt on a regulated market) (Exchange Traded) or over-the-counter (OTC), for hedging, efficient portfolio management and/or investment purposes. The value of these investments can change rapidly and may cause the fund to lose a significant amount of value.
- The use of derivatives may result in the fund being leveraged whereby the exposure of the fund as a result of all positions held by it may exceed its Net Asset Value and may result in gains or losses that are greater than the original amount invested.
- For full details of the fund's risks, please see the prospectus which may be obtained from the address in the 'Practical Information' overleaf.
