About 7IM

The "7" in 7IM refers to the seven original founders of the business.

Back in 2002, they couldn't find a firm who they trusted to manage their families' money properly – so they started their own company to provide the kind of investment service they were looking for themselves, but were unable to find.

Their aim was to deliver steady returns over the long term, while keeping an eye on risk, using the best available technology. They wanted everyone to have access to the kind of service and expertise that institutional investors would expect.

Our team, client base and funds under management have grown steadily over the years. From our offices in London and Edinburgh, more than 500 talented people manage over £20 billion for a range of clients, including individuals and families, financial advisers, corporates, charities and trustees.

At 7IM, we provide investment services to professional wealth managers, planners, advisers and private investors. These include: discretionary investment management, a range of multiasset portfolios, an investment and open architecture trading platform, a range of retirement solutions, and a fantastic app, 7IMagine, which brings client portfolios to life.
