As at 31 January 2021

INVESTMENT OBJECTIVE AND PROCESS

This model portfolio aims to provide capital growth by applying active asset allocation techniques to investments. There is a risk of wide fluctuations in capital values.

The model portfolios are based on the 7IM asset allocation. The Asset Allocation framework governs how 7IM combine different asset classes, regions and manager styles to optimise expected returns, but reduce risk.

The current economic and political environment is factored into the portfolio through the quarterly tactical asset allocation.

Portfolios are not automatically rebalanced; rather they are reviewed and adjusted as judged necessary four times each year following our tactical asset allocation process, other than in exceptional circumstances.

Our investment approach is a long term one which means we may not be suitable for those investors who wish to invest for less than 5 years but, we believe that our defined investment process with clear parameters for each of our risk profiles will go some way to reducing the risks associated with investing when used over a 5–10 year period of time. There can be no guarantees. The value of investments may go up and down and you may get back less than you invested originally.

Models are constructed under the principles of prudent diversification. All assets are denominated in UK Sterling.

7IM is responsible for updates of the models.

The investment or investment service may not be suitable for all recipients of this publication and any doubts regarding this should be addressed to your Financial Adviser.

The model portfolio is available for investment across the following account types – GIA, ISA, SIPP and Offshore Bond.

MODEL AVAILABILITY AND RISK MAPPING

The 7IM Model Portfolios are available via the majority of the major wraps and platforms. Additionally, we have mapped our model portfolios to a range of the most frequently used risk profiling tools. If you would like further information relating to either of these areas, please call us on 020 7760 8777. Our model portfolios are rated by a number of research and rating firms.

7IM's Model Portfolios are mapped against a selection of third party risk profiling tools to assist advisers as part of suitability assessments for clients. Such tools are however only one aspect of an adviser's suitability process and other such as the clients' investment term/horizon and knowledge and experience should also be considered.

The methodology of third party risk profiling tools is not endorsed by 7IM and individual model portfolio risk profiling scores may not correspond precisely to the risk indicators in the 7IM Model Portfolio literature.
